Hiring Manager  
Providence Health & Services  
Seattle, WA

Dear Hiring Manager,

I am excited to apply for the position of Associate Clinical Research Associate Clinical Research Coordinator at Providence Health & Services, as advertised. With experience of more than three years in clinical research, regulatory compliance, and data management, I have a strong background that resonates with your organization's mission of delivering patient-centered, whole-person care. I have worked in regulatory compliance, clinical operations, and cross-functional collaboration that stands out in this role.

Successfully managed IRB submissions, FDA regulatory compliance as a Clinical Research Associate at Syneos Health, strictly following the requirements of institutional and federal policies. I have also contributed to training team members in protocol preparation for ensuring their compliance accuracy while collecting the data and data management. I have quite a good understanding of FDA processes, data integrity, ICH, GCP and regulatory guidelines—the requisites for the Associate Clinical Research Analyst position. Building on this experience, as a Medical Coding Analyst, I worked to ensure accuracy in the development of medical codes that met the CMS HCC model guidelines. I solidified my understanding of regulatory frameworks and the importance of preparing documentation.

I am currently elevating my expertise by pursuing a master's in information science with a focus on Health Informatics. My education has thus strengthened my skills in the field of data modeling, data visualization, and AI—skills that I am very much

looking forward to applying at Providence to optimize clinical research operations and support data-driven decision-making.

Thank you for considering my application. I am looking forward with pleasure to possibly having the opportunity to contribute to Providence's continuing commitment to regulatory excellence and patient safety.

Warm regards,

Jhansi Veeranki.
